

User Story - Documents Checklist & Upload

As a fleet coordinator,

I want to upload and manage required documents against a claim with proper date and time tracking,

So that all necessary documentation is securely stored, traceable, and easily accessible for review and sharing.

Acceptance Criteria

1. Documents Checklist Display

System should display a predefined checklist of required documents:

- Bank Statement
- Utility Bill
- Driving License (Front)
- Driving License (Back)
- Taxi Badge
- Customer Insurance (Optional / If applicable)

2. Upload Functionality

Each document type should have an **Upload button**

User can:

- Upload files (PDF, JPG, PNG)
- Replace existing document
- View uploaded document
- Delete document (with confirmation)

3. Mandatory vs Optional

All documents are **mandatory** except:

Customer Insurance → marked as **Optional**

4. Date & Time Stamp (Important)

System should automatically capture and display:

- **Upload Date**
- **Upload Time**
- **Uploaded By**

Timestamp should update when Document is replaced.

5. Status Indicator

Each document should show status:

- Not Uploaded
- Uploaded
- Pending Review

- Verified

8. Storage & Linking

All documents should be:

- Linked to **Case ID**
- Stored securely (backend storage / S3-Bucket)
- Accessible in **Document Repository / Activity Log**

Note:

- *Auto-flag case if **mandatory documents missing***
- *Show completion % (4/5 documents uploaded)*
