

User Story: Penalty Charges - PCN Management

As a user,

I want to create and manage penalty charge notices (PCNs), upload supporting documents, track liability transfer and manage PCN statuses,

so that the full PCN handling process can be managed centrally within the CRM system.

Council Details Section – Requirements

Fields & Behaviour

1. Council Name

i. Mandatory field

ii. User can:

Select council from searchable council database

Or manually enter council name if not available

iii. On council selection, related council details auto-populate

2. Council Address

i. Mandatory field

ii. Multi-line text field

iii. Auto-filled if council selected from database

iv. Editable by user

3. Council Postcode

i. Mandatory field

ii. Auto-filled if council selected from database

iii. Editable by user

iv. Should support UK postcode format

PCN Details Section - Requirements

Fields & Behaviour

1. PCN Number

i. Mandatory field

ii. Manual entry field

iii. Alphanumeric values allowed

2. Date of Offence

- i. Mandatory field
- ii. Date picker field
- iii. Future dates are not allowed

3. PCN Status (Dropdown)

- i. Mandatory field
- ii. Dropdown options (Open, Liability Passed, Appealed, Paid, Closed, Rejected, Pending Response)

4. Liability Transfer Status (Dropdown)

- i. Mandatory field
- ii. Dropdown options (Not Sent, Sent to Council, Accepted , Rejected)

5. Response Deadline

- i. Optional field

- iii. Used for reminder tracking

Documents Section – Requirements

1. Upload Documents
2. User should be able to upload:
 - i. PCN Notice
 - ii. Appeal Letters
 - iii. Liability Transfer Letters
 - iv. Payment Receipts
 - v. Supporting Documents
 - vi. Council Correspondence

Upload Behaviour

- i. Multiple document upload supported
- ii. Supported formats: (PDF, DOC/DOCX, JPG/JPEG, PNG)
- iii. Uploaded documents should display:
 - File Name
 - Uploaded By
 - Upload Date & Time
 - Document Type
- iv. User should be able to: [View, Download, Delete (permission based)]

CTA: Generate Liability Transfer Letter

On click:

✓ System auto-generates liability transfer letter using:

- Hirer Details
- Vehicle Details
- Council Details
- PCN Details

✓ User can preview generated letter

✓ User can download letter as PDF

✓ Generated document automatically saves in Document Library

Timeline / Activity Log Section - Requirements

System should maintain **activity history** for:

- PCN creation
- Status changes
- Document uploads
- Letter generation
- Reminder updates
- Notes/comments
- Liability transfer updates

Timeline Display

- Most recent activity displayed first
- Timestamp and username visible
- Timeline collapses/expands similar to existing Activity Log design

Reminder Section – Requirements

Automated Reminders

System should support reminders for:

- Council response deadline
- Appeal deadline
- Payment due date
- Follow-up reminders

Reminder Behaviour

- Reminder dates manually configurable
- Reminder notifications visible within CRM
- Overdue reminders highlighted visually

Notes Section – Requirements

Behaviour

- i. User can add internal notes/comments against PCN
- ii. Notes should display:
 - Username
 - Timestamp
 - Comment text
- iii. Notes should appear within timeline/activity log

CTA: Save Penalty Charge

On click:

- ✓ System validates mandatory fields
- ✓ Penalty Charge record is saved successfully
- ✓ Documents and timeline entries linked to PCN record
- ✓ Success confirmation displayed to user

Acceptance Criteria

- Council Name, PCN Number, Date of Offence, PCN Status and Liability Transfer Status are mandatory
- Council details can be manually entered or selected from council database
- PCN Status dropdown shows only defined options
- Liability Transfer Status dropdown shows only defined options
- Future dates are not allowed for Date of Offence
- Multiple document upload supported
- User can view/download uploaded documents
- Liability transfer letter generates successfully
- Generated letter saves automatically in Document Library
- Timeline displays all PCN activities
- Reminder functionality works correctly
- Notes are visible within activity history
- Save CTA successfully stores all entered information
